EECS486 Object-Oriented Methodology
Homework 1

Assigned: 10JA03
Due: 21JA03, by 8:40am
Points Possible: 40 points

- All work is individual effort.
- All diagrams must be drawn in the latest version of MS-Visio that is available on CAEN machines.

It has been said that 90% of all relevant material in a textbook may be found on the inside front cover and inside back cover of the textbook. Let’s assume that this is true.

The objective of Homework 1 is to recreate a four-page study guide for the Unified Modeling Language (UML). The four-page study guide is a duplicate of the inside front cover and inside back cover of the text for this class.

Use the Visio UML stencil package to create all drawings. Please note, using some intelligible method (different color, attached descriptive text, etc), when an alternative to the UML stencil package has been used.
