Due: November 29, 2010

Please submit a computer-generated report that consists of a cover page and 2-page text by the class time on 11/29/10. The font size should 11 point or larger.

Read and summarize

1. One (1) paper on small proprietary real-time operating systems;

2. One (1) paper on real-time extensions of general-purpose OSs;

3. One (1) paper on low-power embedded OS/middleware; and

4. One (1) paper on low-power memory or disks

Again, your report must follow the format specified in the first handout, and the main sources are annual IEEE RTSS and RTAS proceedings, ACM SOSP, USENIX OSDI and Annual Technical Conference proceedings. (You are NOT restricted to these sources!)
