Eng 101
Day 8
Quiz and coding

Quiz
• Quizzes are closed book, notes, and everything else.
• Quizzes will be handed out early
  – Do not turn them over until directed to!
• Answer all questions in the space provided
  – Circle your answers.
• Indicate spaces with an underbar.
• 20 minute quiz.
  – If you finish early, just wait.

Today
• Discuss another algorithm for sorting
  – Idea is to take a well understood task (sorting) and propose an algorithm.
  – Once we get the algorithm down, we figure out how to code it.

Algorithm
• Go through each element of an array.
  – Find the smallest element
  – Copy it into the top of a new array.
  – Remove it from the original array.
• Now do the same as above over the original array
  – But keep putting things into the next open space.
Code?

- What do we need?
Pseudo-code
