# EECS 498: Information Retrieval and Web Search

Future permanent course number: EECS 486

### **Winter 2016**

Lecture TTh 10:30-12:00pm Discussion M 1:30-2:30

### **Instructor**

Rada Mihalcea, mihalcea@umich.edu

## **Course description**

This course will cover traditional material, as well as recent advances in Information Retrieval (IR), the study of indexing, processing, querying, and classifying data. Basic retrieval models, algorithms, and IR system implementations will be covered. While the course will primarily focus on IR techniques for textual data, it will also address IR for other media, including images/videos, music/audio files, and geospatial information. The course will also address topics in Web search, including Web crawling, link analysis, search engine development, social media, and crowdsourcing. Throughout the course, there will be one or two invited lectures from people working at major companies in the field (e.g., Google, Yahoo, Microsoft, Facebook, Twitter).

### **Prerequisites**

EECS 281 Data Structures and Algorithms

### **Textbook**

Introduction to Information Retrieval, online version available *Christopher D. Manning, Prabhakar Raghavan and Hinrich Schutze* Cambridge University Press, 2008.

### Course work and grading

Programming assignments: 30%

Exam I: 20% Exam II: 20% Project: 25%

Class participation: 5%
