William L. Everitt Award

Presented by the EECS Department to a top student from each of the three programs of study (EE, CE, and CS). These students are in the top 10% of their class and have an interest in communications and computers, as well as professional interests and activities.

Anthony Bonkoski
Computer Engineering

Anthony was the Electrical Team co-lead for the UM::Autonomy team during the past year, and a member of the electrical team since 2010. The UM::Autonomy team designs and builds a robotic water-surface vehicle that competes in the international competition known as RoboBoat.

The year after transferring to Michigan from a local Community College, he accepted a co-op with Intel Corporation. He remained at Intel through the Fall term to gain further valuable work experience.
