EECS Outstanding Service Award

This award is presented to students who have shown exceptional leadership in their student organizations, service to the University, College, or Department, or service to the community.

Sam DeBruin
Computer Engineering

Sam enjoys sharing his expertise in computer engineering with fellow classmates. As a member of the Michigan Autonomous Aerial Vehicle Team, he worked to bring in a group of interested students to learn printed circuit board design, a key component of the aerial device. These students are now the future of the team. Recently, he devised a novel method to assemble printed circuit boards for an advanced embedded systems class, and then shared his method with other students and on the web.

Sam has also worked on an ongoing research project with Prof. Prabal Dutta. He is a member of HKN and IEEE.
