Class 12:
Conclusion and Staff lectures

Announcements

- Please fill out teaching evaluations when they're out!
  - I take these very seriously and they help the class evolve for future semesters

- GitLab assignment rerun
  - On December 21 all GitLab assignments (basic and advanced) will be rerun from a clean state

  - Deadline is the end of December 20

  - All current penalties will be cleared, but **can be reapplied if your submission still has issues**

  - You can use this as an opportunity to do older assignments that you were not able to complete

- Get your projects checked out!

Conclusion
Some takeaways

- Hopefully terminals and the command-line are less intimidating

- Hopefully you start version controlling things
  - Remember how easy it is to set up a local Git repo?

- If you've kept up with this course, you probably have developed a decent ability to pick up and learn new things
  - You can impress managers at internships with this power (your mileage may vary)

- The next time you run into a productivity problem on your computer, try to see if you can automate it with a script or something

Contact

- Feel free to contact me after the class ends!
  - Pick my brain about grad school, computers, computer architecture, gacha games, operating systems, compilers, embedded systems, and more

Staff lectures

Questions?

Thanks for a great semester!
Good luck on finals and enjoy your break!
