Advanced - Job
Internships, Jobs, and the Summer

EECS 201 Fall 2024

Submission Instructions

Answer the bolded text that begins with a "**Q**". This assignment is an "online assignment" on Gradescope, where you fill out your answers directly.

1 Internships, Jobs, and the Summer (5)

While I encourage everyone to seek an internship for the summer and get some work experience, not every student has the same goals. Pick the prompt that best matches what you'll be doing this summer and answer it.

- **If you already have an internship lined up or are graduating and have a full-time offer:** Write about what sort of role it is and how your application-interview-offer process went.
- **If you'll be doing research over the summer:** Write about what sort of research you'll be doing and with who, and what interested you about the work.
- **If you'll be doing classes over the summer:** Write about what class/classes you'll be taking. What are they about? Are they just requirements you're ticking a box off for or are you really into the topics?
- **If none of these:** what are your plans for the summer? Is there a particular reason why you don't want to/can't? Will your summer plans align with future goals? It's also totally fine to enjoy your summer on your own terms!

Q: Write your response on Gradescope.
