### 1 Download the Lectures (10)

Create a shell script file called `lectures.sh` and commit it. Make sure to put a proper shebang line on the **first line** (e.g. `#!/bin/bash`)!

What this script should do is use `wget` or `curl` to download the PDFs of lectures 1 through 9.

As a result of running this script, you should see the following files in your current directory:

```
lec1.pdf
lec2.pdf
lec3.pdf
lec4.pdf
lec5.pdf
lec6.pdf
lec7.pdf
lec8.pdf
lec9.pdf
```

**Don't commit these PDFs!**
