

# EECS 198

Offered for the first time **Fall 2018** - *one-credit class*

- > Interested in computer science?
- > Heard about programming, but not really sure how it works?
- > Want to see how computers connect to real-world applications in many disciplines?

*Come join us and discover how computer science is reshaping the world!*

## Discover Computer Science

This class is open to any student with no formal programming experience, and is particularly designed for **incoming freshman women**.

**Thursday:** 5-6pm

**Instructors:** Rada Mihalcea and Laura Wendlandt

*Discover Computer Science is a one-credit class where you will explore the exciting world of computing!*

Throughout the semester, we will:

- > Learn core computer science concepts
- > Learn how to write code
- > Get hands-on experience in several computer science areas
- > Meet researchers and computing professionals and hear about their experiences
- > Visit a local computer science company
- > Explore interdisciplinary applications of computer science
