RE: 2090301935

Officer Laginess- attached is the notification I received earlier today, with their photos, notifying me of the damages. I have also attached a photo of damages to the RME-69 radio. Everything else is minor in comparison.

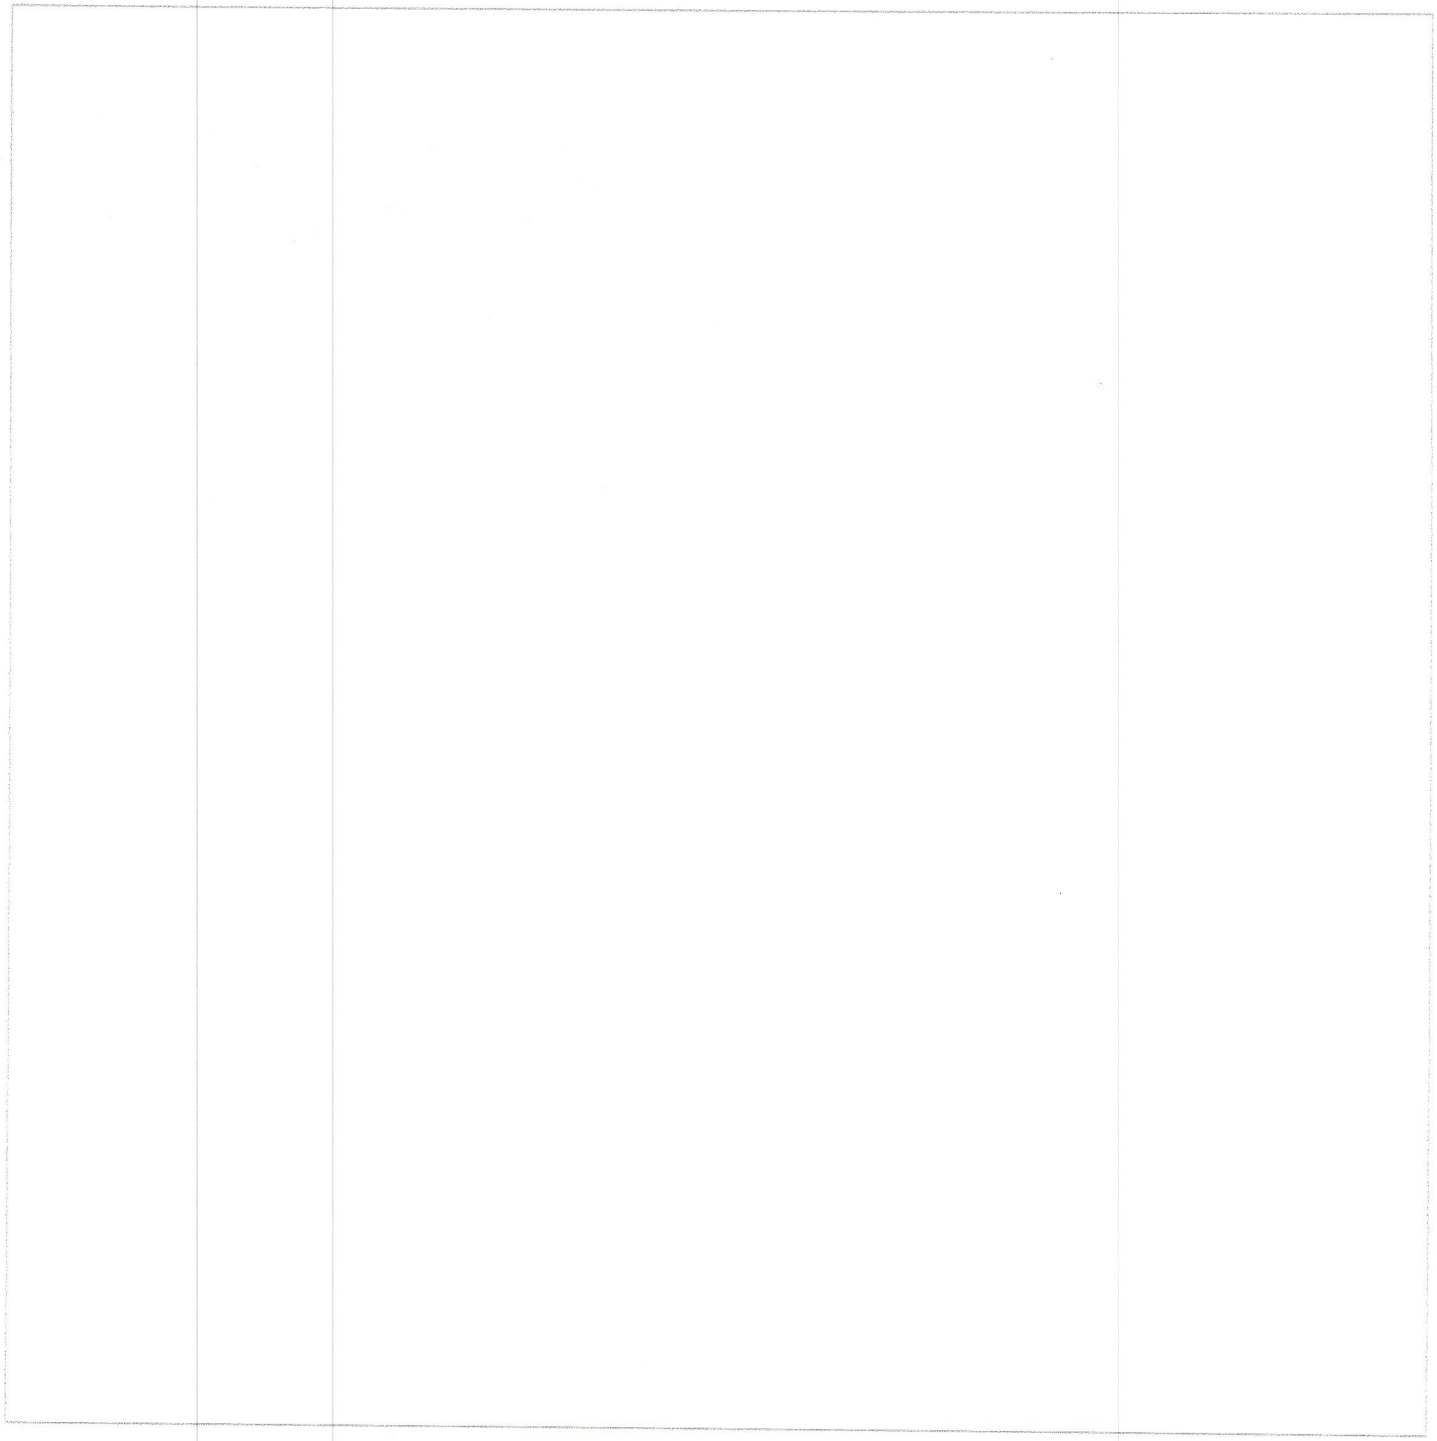

Included on this email are the building manager Paula Pernia and our faculty advisor Dr. Mortazawi.

The damages include;

1. RME-69 Radio Receiver- this radio is of significant importance. Damages includes a shattered glass screen, a broken / sheared off right tuning dial with suspected damage to the tuner and a seized left tuning dial with suspected damage to its dial and tuner. Cost to repair is unknown at this time. Any additional damage is unknown at this time. This radio is circa 1930-1940.

2. 21" Computer Monitor: estimated replacement cost is $70-110 at Best Buy.

3. Hakka Soldering Station: cost obtained from company catalog is $110.

4. Lamp Bulb: circular light bulb is $5 at Home Depot.

5. Reinstall shelving & hardware...

Subject: Urgent: Ham Shack bad news
To: W8UM Ann Arbor <palmy@umich.edu>, <kitn@umich.edu>

Good morning John,

Hope you are doing well but I've got some bad news. I'm a not-so-active member of W8UM and don't know who exactly to contact regarding shack issues. This morning I decided to swing by the shack before I leave town for the summer tomorrow, and as soon as I unlocked the door there was a pretty nasty surprise. I attached some pictures and you can see

the damage yourselves.

It looks like some drywall screws didn't hold and a set of shelves above the workbench got ripped out. There's a lot of debris and equipment strewn about. Not sure if there are any tubes in old radios that might've broken. The door has a lock so I think it must've fallen down itself sometime in the last few weeks. It's pretty shocking and unfortunate and I don't know what the extent of the damage is.

I'm leaving for Kalamazoo tomorrow and just secured locked the door again and left but it'll take some time to clean up once things start up again. Everything else in the room looks fine. Again, I don't know who to notify so I thought I'd let you know. Please advise!

Thanks,
Koichi Anderson

Hello Everyone,

This is Officer Laginess with the University of Michigan Police Department. First, thank you John, for sending me the photos and detailed description of the items. Please let me know once you have a cost estimate for the RME-69 Radio Receiver and if there are additional damages discovered as you go along. I am currently working on the report, which you can request a copy of Monday-Friday during the daytime hours. Please call ahead of time, as I am unsure if our Records Management team members are working from home during the COVID-19 pandemic.

If you have any questions or concerns, please do not hesitate to contact me through email, or you can call (734)763-1131 to speak with our dispatch center. I will be switching to midnight shift as of tomorrow, so any emails you send to me may have a delay as I will be sleeping during the day. I will respond as soon as possible.

Best wishes to all of you and I am so sorry this happened to your equipment. I truly hope that it can be repaired, especially with it being historical equipment!

Officer Laginess

Hi John,

Because the radio club is a UM sponsored student club, the damage from the collapsed shelving should be covered under risk management. Please complete a risk management claim form - http://www.finance.umich.edu/risk-management (click start a claim) and work with Don Winsor on working up a cost for repairs/replacements for the claim. Submit the form to Bill Sams (willsams@umich.edu) and Jim Karjalainen (jkarjal@umich.edu) and Cc me so I have a copy for my records.

Best,

Paula
