Vol. XXIII, No. 119. ANN ARBOR, MICHIGAN, THURSDAY, MARCH 20, 1913. PRICE FIVE CENTS

## NO LIMIT IS IMPOSED UPON MEET ENTRIES

**Both Cornell and Michigan May Place Any Number of Men in Competition for Saturday's Contest.**

**THIRD PLACES WILL COUNT FOR POINTS IN CONFLICT.**

**Varsity Will Probably Derive Great Benefit From Change in Rules.**

No limit is imposed on the number of men that the rival universities can enter in the Cornell-Michigan dual scrap, and third places will count for points. These changes from the restrictions of the Syracuse meet should prove a big advantage to the Wolverines as there are many men in school who have the speed to run third in different events, but cannot better this position.

Michigan plans to steal all three places in the thirty-five yard dash with Seward, Lapsley, Craig, and perhaps Bond. The extenuated sprinter is always slow in striking his gait, but is now coming along rapidly and may place in the berth behind Seward and Lapsley. The leg injury that kept Lapsley from the Syracuse trip is bothering him less this week and he expects to be in perfect form for Saturday. Opposition to this program will be met in the person of Keller who is backed by the Ithacans to crowd Seward for first.

In the high hurdles, which is the lone barrier race, Whinery of Cornell should run second to Craig, leaving the third ribbon to be fought for by McNabb and Greene, both of Michigan. Jansen who placed in the highs in the Syracuse battle may be used in this

(Continued on page 8.)

## TO CAMPAIGN FOR RESIDENCE HALL

**Association of Michigan Women to Start Raising $50,000 Fund.**

**SITE IS NOT YET CHOSEN.**

The Association of Michigan Women will initiate a campaign to raise a $50,000 fund with which to erect a residence hall for women students of the university. This action was taken at a meeting of the residence hall committee at the College club in Detroit Saturday afternoon. The proposed hall will accommodate 50 women.

It is hoped that women in Detroit will be able to give considerable impetus to the movement if present plans for interesting business men in that city materialize. The association with its various branches in the state, will inaugurate a monster campaign for funds immediately.

The committee has been investigating conditions at the eastern schools, including Wellesley and Simmons. From these reports it has been decided that the small halls are the best, considering present conditions at Michigan.

It is the intention of the committee to have the hall assist in aiding a few women through the university by supplying clerical work which will be necessitated by the new building. No site for the proposed building has been selected.

That there is a decided call for the dormitory system at Michigan is shown by the recent establishment of League houses for women. Since the women at Michigan constitute only one-seventh of the total enrollment, the question of living facilities, especially for freshmen, is a big problem, which it is said the proposed hall, with those which are to follow, will solve. It is also expected that the introduction of these halls will clear the way for the settlement of the question of pledging freshmen, which is now before the sororities.

### THE WEATHER MAN

**Forecast for Ann Arbor**—Rain late tonight and warmer.

**University Observatory**—Wednesday, 7:00 p. m., temperature 50.0; maximum temperature 24 hours preceding, 57.0; minimum temperature 24 hours preceding, 39.0; average wind velocity 15.6 miles per hour.

**Prof. Scott to Speak at Notre Dame.**

Prof. F. N. Scott of the rhetoric department leaves this morning for Notre Dame University where he will address the school of journalism. His lecture will deal with newspaper work.

## TO PICK LEAGUE ORATOR TONIGHT

**Five Men Are Entered in Annual Contest; Were Picked From 22 Entries.**

**WINNERS RECEIVE TESTIMONIALS**

Michigan's representative in the Northern Oratorical League will be picked at the university oratorical contest in University Hall tonight at 8:00 o'clock, the date having been advanced from Friday to avoid a conflict with the State Peace contest at Ypsilanti.

Five men who were picked from the 22 entries in the various class contests will speak tonight. The winner will receive the Chicago Alumni Medal and Kauffman testimonial of $100.00 while second place will be awarded a Kauffman testimonial of $50.00.

The speakers, their subjects, and the order in which they will appear, are as follows: J. L. Primrose, '13, "Industrial Peace;" H. E. Goodenow, '13, "Unrealized Self;" S. J. Rosenstein, '15L, "America and the Jew;" Percival V. Blanshard, '14, "Christianity and the Social Crisis;" and W. C. Mullendore, '14, "The Degredation of Our National Honor."

Judge Arthur J. Tuttle, '92-'95L, of the Federal bench at Detroit, has consented to act as the presiding officer. The judges are Asst. Dean W. H. Butts, of the engineering department, H. M. Slauson, and Professors W. H. Henderson, S. L. Bigelow, J. L. Markley, and J. S. Reeves.

The general admission will be 25 cents, but oratorical association membership tickets will admit.

**UNIVERSITY SECURES SLIDES USED BY EWART G. CULPIN.**

**Efforts of Prof. Aubrey Tealdi Bring Entire Collection to Ann Arbor Permanently.**

Through the effort of Prof. Aubrey Tealdi, of the department of landscape design, the entire collection of slides used by Ewart G. Culpin in his extensive lecture tour in America has been secured for the university. Michigan was given the preference over several other universities, all of whom were anxious to have the set. They will be used by classes in landscape designing and probably also in architectural courses.

The collection embraces not only all the slides shown to Ann Arbor audiences, but also many others which trace in detail the development of Town Planning from the dawn of history to the present day. The acquisition of this collection is of particular interest as it is the most complete collection of its kind that can be found in America today.

The slides of special note are those of London, Paris, Vienna and several German cities, particularly those of "The City of the Future." The last group is one on which Mr. Culpin has spent much personal effort and original work, many plans and relief maps having been necessary to bring them to their final completion.

**Senior Engineers Dine Tonight.**

The senior engineers will dine at the Union this evening at 6:00 o'clock. L. H. Paddock, '13, will act as toastmaster and Prof. H. C. Anderson and Frank Gibbs, '13, will be the speakers of the evening.

## ENTIRE OPERA IS REHEARSED AT ENSEMBLE

**After Nearly Four Months of Piecemeal Preparation, "Contrarie Mary" is Practiced in Full.**

**ADVANCE TICKET SALE TO OPEN TOMORROW AT WHITNEY**

**Total of Slips Distributed to Union Members Has Reached Over 1,000.**

After nearly four months of piecemeal preparation, the first complete rehearsal for "Contrarie Mary," the 1913 Michigan Union opera, was held last night at the Union. Director St. John put his proteges to work on the opening chorus at the beginning of the practice, and within two hours the entire show, with the exception of a few features, had been rehearsed.

Prospects for a "best ever" performance look better at every rehearsal, according to those who have seen the men in action. Practically all of the lines have been learned by the leading characters, the choruses are singing and dancing in veteran style, and the orchestra has almost conquered the difficult music.

With nearly a week remaining in which to perfect the presentation, those in charge hope to be able to put on a performance absolutely free from hesitancies on the first night. Last night's rehearsal went through with only occasional prompting, despite the fact that it was the first time that the chorus work and speaking lines had been co-related throughout.

**Wooden Legs Arrive.**

The wooden legs and accompanying harnesses for the "Old Jerry Bones" number arrived yesterday, and the timbers were sawed down to accommodate the members of the chorus taking part in this feature. The blanket scene, at the finale of act one, in which Sobley, a gloomy student played by Waldo Fellows, '14, is tossed in the air on top of an immense canvas, was rehearsed for the first time last evening.

**Tickets Go On Sale Tomorrow.**

More than the advance sale ticket slips were given out to members of the Union yesterday. This brings the total distributed to date to slightly over 1,000, which is nearly three times as many advance coupons as were handed out during the entire period last year. From this indication, it is expected that the ticket sale for "Contrarie Mary" will outdo all precedents in the history of the annual Union productions.

The advance ticket sale for the 1913 show, for Union members only, will open tomorrow, at the Whitney theater. Members will have their last opportunity to obtain slips allowing them to purchase seats in the advance sale, at the Union today.

**REVIVE TALK OF HOLDING PREP MEET IN ANN ARBOR.**

**It is Believed Schoolmasters Will Welcome Both University and M.A.C. Gatherings.**

Talk of the University of Michigan holding an invitation interscholastic meet this spring has been revived by the announcement that the Schoolmaster's association has given its indorsement to the plans of M. A. C. for re-establishing the latter's annual classic. This action on the part of the pedagogues has given rise to the belief that they will remove the ban from the university affair.

Director Bartelme is of the opinion that the Schoolmaster's association will extend its endorsement to the university, but has not yet made decisive plans for the holding of an invitation meet here.

In the event of the prep school athletes being invited to Ann Arbor in the spring, the scope of the invitations will not be confined to state schools, but will be sent to the schools of adjoining states.

## ENGINEERS TO EXHIBIT WORK OF DEPARTMENT

**Work of Students and Apparatus Used in All Sub-Departments is to be Shown May Festival Week.**

**STATE LEGISLATURE WILL BE INVITED TO BE PRESENT.**

**Idea is to Advertise Work of Engineering College and University.**

Plans for a mammoth exhibit to be held May Festival week, that will place before the public the work that the engineering department is doing along all technical lines have been begun by the students in the mechanical lab courses.

It is planned to have on exhibition besides the work of the students, the various machines and apparatus that the department has for the benefit of its members. The several sub-departments have been appealed to and committees have been elected by the civil mechanical, chemical, and architectural students. It is expected the other departments will elect their committees in the near future.

The state legislature will be invited to attend and the exhibit will be advertised state wide. It is hoped by having the exhibit May festival week to obtain a large attendance.

At present the matter is in the hands of the various committees, but within a few days a general chairman will be appointed who will personally direct the affair.

"We hope to be able to show people what the department is doing" said Saul Saulson, '13E, "and to create a greater interest in the state in the engineering college. If the plan is a success, it is hoped that next year the whole university will join in holding a monster exhibit from all departments."

When asked what he thought of the exhibit, Prof. J. A. Bursley of the mechanical department said, "There is a big field for something of this kind and I think it will be an excellent means of advertising the department and the university."

**TALKS ON "HIGHER EDUCATION IN THE U. S. AND GERMANY."**

**Prof. Rudolph Tombo, Jr., of Columbia to Leture Tonight on "Parsifal."**

"Higher Education in the United States and Germany" was the subject of a talk by Prof. Rudolph Tombo, Jr., of Columbia University, under the auspices of the Ann Arbor Stadtverband in the high school hall last night. Prof. Tombo showed the principal difference between German and American universities and illustrated his talk with pictures of buildings and activities at the different universities in both countries.

Prof. Tombo will deliver another lecture tonight on "Parsifal." The lecture will be illustrated with pictures, taken at a performance of that opera in the Metropolitan Opera House in New York city. The tickets for last night's lecture will admit to tonight's talk as well, and additional tickets may be purchased at the door for 25 cents.

Prof. Tombo will be entertained at dinner this evening by the Theta Delta Chi fraternity of which he was for several years national president.

**HILL AUDITORIUM MAY BE FILLED AT FESTIVAL TIME.**

Seats for the coming May Festival are being disposed of so rapidly that from present indications it is believed that Hill auditorium, with twice the capacity of University Hall will be filled for the concerts.

Seats in block "B" went on sale Monday for $5.50, or $2.50 to pre-festival ticket holders. On Saturday, the price will be reduced to $5.00, or $2.00 to pre-festival ticket holders. During this sale mail orders will not have precedence as was the case in the sale of blocks "A" and "B";

**M. A. C. SENDS THANKS BY WIRELESS.**

By means of a wireless communication, M. A. C. expressed its appreciation of the talk by Prof. C. S. Denison of the engineering department at the engineers banquet given at Lansing Tuesday evening. Mr. Denison was sent as a substitute for Dean M. E. Cooley who could not be present on account of illness. The communication was as follows: "We were sorry that Dean Cooley was not here last night, but the engineers banquet was a great success, and we appreciated the talk given by his substitute."

## YEARLINGS SHOW VARSITY CALIBRE

**Verdant Tracksters Will Help "Steve" Farrell Build Up 1914 Team.**

**STARS UNCOVERED IN MEET.**

If any doubts were entertained by "Steve" Farrell, concerning the place to look for material of the proper timber to fill the gap that will be made by the graduation of some of this year's stars, all such doubts were effectually settled by the performance of the freshmen athletes in the M. A. C. dual meet, last Saturday.

Catlett, by clearing 10 feet, 9 in. in the pole vault, marks himself as a contender for the Varsity in the next season. Cross, while not vaulting in the best way Saturday, has made 11 feet in practice and is expected to make the competition for the vaulting honors still keener.

H. L. Smith and Monetta will brisken the fight in the dash with Seward and Lapsley. Monetta is not only fast across the gym floor but has proved himself a flier on the century dash.

Over the hurdles, Armstrong is the fastest man in the freshman class, but has nothing on the sophomore hurdlers, Greene, Cohn, and McNabb. He may develop into a star of Varsity magnitude as his form over the barriers is better than that shown by the sophomore trio.

C. B. Smith will be a Varsity candidate of the first water, as the only man now in school that can keep ahead of him in the quarter mile is Haff, who is running for his last year. Trainer Farrell has every confidence that the Bay City lad will make a phenomenal showing in track before his term of four years is up.

The 880 yard run will be strongly reinforced by the eligibility of Uffer for Varsity competition, so that Michigan in next year's meets will be able to make bids for two places in the half, with Carver leading the younger runner.

In the mile and two mile run, there will be no veterans next season, but replenishment in this event will be accomplished in a fair way by the freshmen. Fox, Lynch, and Richards are better milers than a freshman class has produced since the verdancy of Haimbaugh.

No added strength to the Varsity in the shot put and high jump is anticipated, as the best mark with the weight on Saturday, was considerably under 40 feet, and none of the jumpers could negotiate more than 5 feet, 4 in.

One more chance will be given the freshmen to show their class, when the trip is made in May to East Lansing to afford the agriculturists an opportunity to regain on a familiar track the laurels lost in strange surroundings, last Saturday.

**Women May Secure Tickets Today.**

Admission cards for the women's banquet will be on sale today in the library from 8:00 o'clock until 4:00 o'clock. Both undergraduates and collegiate alumnae can procure tickets at this time.

**Prof. E. T. Loeffler to Speak Tuesday.**

Prof. E. T. Loeffler, of the dental department, will give a lecture and demonstration on "Radiography" Tuesday evening at 7:30 o'clock in the amphitheater of the dental building.

## HONOR SYSTEM IDEA DECLARED CHIEF FACTOR

**W. H. Hamilton, at Senior Lit Dinner Says Underlying Principle is Step Toward Student Government.**

**PETITION SENATE COUNCIL FOR OUT-OF-TOWN BANQUET**

**About 65 Men Attended Function at Union; W. C. Trible Acted as Toastmaster.**

"The principle of the honor system is much larger than the system itself," said W. H. Hamilton of the economics faculty in addressing the senior lits at their dinner at the Michigan Union last night. "It is an important step toward student self government."

"This question involves the whole problem of the social responsibility of the student. Whatever gives the student responsibility for his conduct tends to give him a vital respect for the social system as a whole, and fits him to take a fuller part in university affairs."

Mr. Hamilton commended the seniors highly for their stand on the introduction of the honor system into examinations, and said he thought it a long step toward student control on the campus. What a student gets out of his college course, he said, is more or less intangible and indefinite, but he is bound to feel the favorable effect of the introduction of an honor system and anything else which tended toward student self-government.

During the evening a motion was passed that the senate council be petitioned to allow the class banquet to be held outside of Ann Arbor.

Edward Lazear and Arthur H. Kuhn of the senior engineers were present

(Continued on page 6.)

## NAME COMMITTEE TO STUDY UNIONS

**Michigan Organization to Conduct Investigations of Other Student Clubs.**

**RESULTS TO BE TABULATED.**

For the purpose of inquiring into the status of unions, and other similar student organizations, at the principal universities in the country, President Edward C. Kemp, of the Michigan Union, announced the appointment of a special committee last night.

The men named will meet sometime this week, at which time a number of institutions will be apportioned to each man, and letters of inquiry will be despatched. As a result of the investigation, it is expected to determine the membership, social activities, equipment and method of management of all the principal student commons in the United States.

The following students, assisted by Prof. William A. Frayer and Louis Ayers, '08, of the house committee, will serve on the special committee: Frank Murphy, '14L, chairman, Emmett Taylor, '13, D. H. Mosier, '13L, and Werner Schroeder, '14.

Results obtained from the inquiry will be tabulated, and the statistics later used in directing the efforts of the Union. It is expected that the influx of new ideas will suggest a number of novel lines of activity for the local organization.

**ANOTHER CHANCE AT CREDITS OFFERED TO SENIOR JURISTS**

Senior laws suffering a loss of credit last semester under the new marking system will be given another chance to pass the examinations immediately after the spring vacation. The list of subjects in which the examinations will be given will be posted before vacation, and all students who failed to get the required marks will be allowed another chance in these subjects.

## LOCAL WIRELESS STATION IS EXAMINED BY INSPECTOR

Federal Official Issues Temporary License to University Plant.

Inspector Dillon, federal district examiner of wireless telegraph stations, reported the university wireless plant to be the strongest university station in his district, after an examination of the plant yesterday morning.

A permanent license was not issued to the station, however, because of the new ruling of the Secretary of Commerce which states that experimental plants of technical schools do not come under any of the classes described in the law regulating the actions of commercial stations.

A temporary license, an experimental school certificate lasting one month, was given to the station, with the promise that it would be supplemented by a permanent license as soon as the bureau has definitely decided how to class the 40 or more technical school plants which are at present sending and receiving messages.

## MATERIAL FOR 1913 ANNUAL IS BEING SENT TO PRINTERS

All material for the 1913 Michiganensian has been handed in and much has been sent to the printers and engravers.

The art work, due to the prizes offered by the editors is of a much higher class than last year, there being several designs of each drawing to choose from. Plates of the different academics of the five books of the volume have been returned from the engravers showing several views of Ann Arbor in colors.

## NEW YORK ALUMNI CLUB HAS POSITIONS FOR GRADUATES.

The University of Michigan club of New York, through its employment bureau, has several opportunities to offer graduates. A man with chemical training is wanted in the laboratory of a manufacturing concern. A graduate with salesmanship and executive ability can be placed with a large wholesale musical instrument house. An old Brooklyn law firm has an opening for a graduate who is a member of the New York bar, or ready to pass its examination, with good credentials from Dean H. M. Bates. Further information can be obtained from Earl D. Babst, 409 W. 15th St., New York City.

## THE MICHIGAN DAILY STARTS SUIT AGAINST ADVERTISER

The Michigan Daily will make its initial appearance in the courts of law tomorrow morning, when its suit against E. R. Frost comes up before Judge Doty. The case which was instituted to recover $51.65 for an unpaid advertisement is scheduled for 10:00 o'clock. Three members of the business staff, Joseph Pouchard, A. R. Johnson and Emerson R. Smith will testify for The Michigan Daily.

## POST GRADUATE FORESTERS FORM CLASS ORGANIZATION

At a class meeting held February 24 the post graduate foresters organized by electing class officers. D. C. Birch was made president and H. W. Goddard secretary and treasurer. Every two weeks, beginning after the civil service examination, they will hold discussions and debates upon principal forestry issues of the day.

## Alchemists Hear of Color Photography

At a meeting of the Alchemists held in the Chemistry building last evening at 7:30 o'clock, Mr. J. H. Matthews gave a talk on "Color Photography and Some of Its Applications."

Episcopal Theological School

CAMBRIDGE, MASS.

The location offers unequalled opportunity for graduate work at **Harvard University.** For catalogue address DEAN HODGES.

## POSTPONE FINAL CONTEST FOR ORATORICAL TRYOUTS

Michigan's Representative in Hamilton Contest to be Picked Tonight.

Owing to the entrance of two new men, the final contest to decide Michigan's representative in the Hamilton Oratorical contest will be held this evening, instead of last night, as arranged.

B. J. Jonkman, law special, and J. W. Harding, '14L, the two new men, increased the entry list to 10 and these were evenly divided for two preliminaries. One was held last night, and the other will be held this afternoon, while six men will speak tonight, three from each preliminary.

Lyman S. Hurlburt, '14L, Louis D. DeVid, '15L, and Bartel Jonkman were chosen last night, with W. W. Schroeder, '14, as alternate.

The final contest tonight will be held at 7:30 o'clock in room B of the law building, and will be open to the public.

## JUNIOR CLASSES PLAN TO HOLD "JAMBOREE" APRIL 25

April 25 instead of March 20 is the date on which this year's "Junior Jamboree" will be held, according to plans formulated at a joint meeting of the third year lit and engineering social committees held yesterday afternoon. The change was made because of conflicts on the night of the earlier date.

Detailed plans of the party have not yet been drawn up, but simplicity will be the keynote of the dance.

## SUGGESTION BOX IS AID TO FORESTRY DEPARTMENT MEN.

Foresters have placed 75 topics for consideration in the suggestion box since its installation three months ago. The box is opened at every faculty meeting and all suggestions are duly considered. Faculty comment is placed below the suggestions which are posted on the bulletin board.

## SOPH LITS START CAMPAIGN TO COLLECT UNPAID DUES.

Circular letters have been sent out by the finance committee of the soph lits requesting each member to pay his dues. The letters state that the class has not enjoyed as prosperous a year as would be possible if all accounts were settled, and urge that all dues be paid at once.

Dues will be collected tomorrow in University hall from 3:00 until 5:00 o'clock. Those who have already paid are asked to wear the tags they received at the time of payment.

## New York Alumni to Hold Reception.

The University of Michigan club of New York has planned an informal reception at which all new members will be welcomed. It announces that pocketbooks will be conspicuous by their absence. The affair will be held at the Chemists' club on the evening of March 14.

## PROF. ROTH WILL TALK AT DETROIT AND BIG RAPIDS.

Prof. Filibert Roth, head of the forestry faculty, will deliver two extension lectures this week end. On Friday he will speak before the Detroit Central high school, and on Saturday he will address the Ferris Institute at Big Rapids. At both places he will speak on general phases of modern forestry.

The best guitar or mandolin for you to buy is made by the world's famed Martin factory. See and try these beautiful instruments at Schneberle and Son's Music House. tf
