CAR THIEVES WORK BEFORE MIDNIGHT

Two-Thirds of all Chicago Automobile Losses Occur Between 7:30 and 12 O'clock

BOYS AND YOUNG MEN MOST OFTEN GUILTY OF THEFTS

(By Associated Press)

Chicago, Ill., March 14—Two-thirds of the automobiles stolen here are taken between 7:30 and midnight, and by far the greatest number at 10 o'clock while their owners are at theatres and other places of amusement, according to the committee on motor car thefts of the Chicago Crime Commission. Three hundred and twenty-three persons were tried here in connection with motor car thefts between January 1 and August 15, 1921.

Other observations of the committee follow:

Easy Courses Chosen

A thief has been known to walk into a large public garage at night and cover the watchman and other employes with a gun while he drove away with the car of his choice. The thief usually prefers to hold up a man about to put his automobile in a garage, rather than to break into a garage after the car is locked up.

By far the greater number of stolen automobiles were taken not because of the intrinsic value, but to be used in various forms of law-breaking.

The large percentage of thefts seem to be committed by men or boys under the age of twenty-five years.

"The careless and indifferent motorist is responsible for the loss of many cars," says the committee. "Many hundreds of passenger cars are left standing at the curb, in alleys, in yards and other unguarded places throughout Chicago every night. Many valuable cars are left standing along boulevards and other streets with engines running while their owners are elsewhere."

Owners to Share Losses

For these reasons the committee expects good results from action of insurance companies reducing rates in motor car thefts and requiring the owner to accept 25 per cent of the loss on stolen cars.

Establishment of a parking place where motor cars may be left under police guard for a fee has, in the opinion of the committee, done much to reduce thefts.

Vanderveer to Build New Store

Plans for a new block on the east corner of South University avenue and Church street have been completed by J. A. Vanderveer. The building will be started in about two weeks. A double store will occupy the first floor and above will be three furnished flats.

CLEVELAND DOCTOR

Dr. M. A. Blankenhorn of Cleveland will be the first speaker on the Undergrass Medical society lecture program. His lecture on "Milky Ascitus" will be given Friday, March 24, and will be followed by a discussion in the nature of a forum by the Michigan faculty. Dr. Blankenhorn is doing research work under Dr. C. F. Hoover, professor of Medicine at Western Reserve university.

Dr. Hugh Cabot is communicating this week with Dr. Will Mayo, of Rochester, and Dr. Edward L. Keyes, an eminent genito-urinary surgeon, of the Cornell medical school in New York city, for later lectures. At least one additional program will be scheduled, one by a man interested in the academic side of anatomy and histology for the special benefit of the freshmen. Nearly 100 per cent of the students have subscribed to membership in the society.

ANN ARBOR LIKES CONCERTS OVER WIRELESS TELEPHONE

As evidence of the sweeping popularity of radio since the introduction of the wireless telephone are the many concerts that are being given in all parts of the city. Private as well as public sets are catching lectures and concerts constantly and in many cases amplifiers are being used so that the sounds may be greatly magnified.

Each night the Detroit News sends out entertainments consisting of lectures and musical numbers, including the Detroit Symphony Orchestra. Thursday night, March 9, Walter Scanlan sang his latest hit "Irish Eyes," which he will sing at the Whitney, March 18. This was heard clearly by the large set of Eberbach and company, at a meeting of the Conopus club at the Union.

COMPENSATION ACT APPLIES TO UNIVERSITY EMPLOYEES

All employees on the University staff, with the exception of the members of the faculties and those employed in clerical work, injured while performing their duties are eligible for compensation in accordance with the workmen's compensation act of the state of Michigan.

At many times, especially when some edifice is under construction when the workmen are employed directly by the University, and not by some contractor in charge of construction, as many as 400 men are employed and must receive compensation for any injuries received during their work for the University.

To provide for this, the Board of Regents has insured its liabilities with an insurance company which takes charge of the payment of all compensations for injuries to the University men.

Freshmen Plan Frolic

Plans are now being made for the annual Fresh Frolic which will be given some time this spring. DeWitt Taylor, '25, is chairman of the affair.

MURAD

THE TURKISH CIGARETTE

EVERY day MURADS are held higher in the estimation of the men who smoke them.

They are the standard of Taste.

They are 100% pure Turkish tobacco—of the finest varieties grown.

They never disappoint—never fail—never change—

You are proud to smoke them in any company—on any occasion.

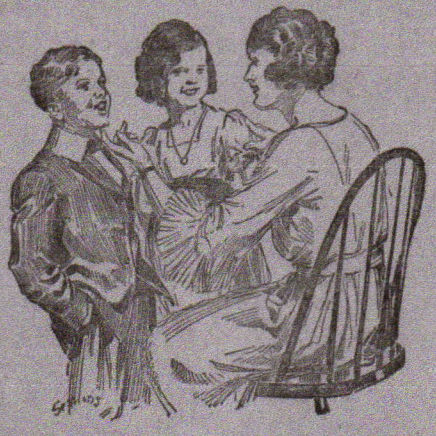

They are the largest selling high-grade cigarette in the world.

The cigarette smokers of America DO prefer Quality to Quantity.

At Your Dealers This Week

Present the coupon to any store named below. You will receive a 10-Day Tube of Pepsodent. Get it today, then watch the delightful effects on the teeth.

Give It to Them—

This trial tube—watch their teeth improve

If you prefer, let your children make this test. Let them brush their teeth a few days in this modern way. Then look and see what film removal means.

This is a way to whiter, cleaner, safer teeth. Millions now employ it. Leading dentists everywhere advise it. Let someone in your home this week show the benefits it brings.

Why teeth look dingy

Your teeth are coated with a viscous film. You can feel it with your tongue. It clings to teeth, gets between the teeth and stays. It dims and may ruin teeth.

Ordinary tooth pastes do not effectively combat it. So film-coats have been almost universal.

Film absorbs stains, making the teeth look dingy. Film is the basis of tartar. It holds food substance which ferments and forms acids. It holds the acids in contact with the teeth to cause decay.

Germs breed by millions in it. They, with tartar, are the chief cause of pyorrhea. Thus most tooth troubles are now traced to film, and, despite the tooth brush, they have constantly increased.

Must remove it daily

Dental science has long been seeking a daily film combatant. Now two effective methods have been found. Authorities have proved them by many careful tests.

A new-day tooth paste has been perfected, to comply with modern requirements. And these two film combatants are embodied in it. The name of the tooth paste is Pepsodent.

Millions of people of some forty races now employ it daily, largely by dental advice.

Two other new effects

Pepsodent brings two other effects which authorities now deem essential.

It multiplies the starch digestant in saliva. That is there to digest starch deposits on teeth which may otherwise ferment and form acids.

It multiplies the alkalinity of the saliva. That is Nature's neutralizer for the acids which cause decay.

Every application gives these great tooth-protecting forces multiplied effect.

Real protection now

Now you can know what really clean teeth mean. Pepsodent fights film-coats, starch and acids—all the great tooth enemies. Then it leaves the mouth in normal alkaline condition. The glistening teeth you see everywhere now show something of the benefits it brings.

New beauty in a week

The Pepsodent effects are quickly seen and felt. This test will be a revelation to you.

Present the coupon for a 10-Day Tube. Note how clean the teeth feel after using. Mark the absence of the viscous film. See how teeth whiten as the film-coats disappear. Note the refreshing taste it leaves.

It will bring you prettier teeth, and quickly. But, more than that, it will bring you safer teeth. Cut out the coupon so you won't forget.
