IMPORTANT EVENTS LIKELY IN ATHENS

GREEK MILITARY DISASTER MAY CAUSE POLITICAL STIR IN CAPITAL

TURKS STOP ADVANCE WHEN BRITISH WARN

Kniff Cruiser Takes French Envoy to Smyrna with Proposals of Three Powers

Athens, Sept. 25.—Athens is likely to be the scene of important political events as a result of the military disaster in Asia Minor, according to declarations by Influential Greeks. A coup d'etat is mentioned as a possibility by which King Constantine will summon a distinguished leader, probably General Metaxas, to conduct the affairs of state as premier, or even as a sort of dictatory, in an effort to rally the people about the existing regime, and especially to support sending a powerful army into Thrace to check the Turkish invasion.

Cabinet Seems Doomed

Constantine is described as undecided about his program, but it is generally agreed that the present cabinet cannot long endure. The people are said to be on the point of demanding a change in government, with vigorous leaders who are capable of uniting and sustaining the patriotism of the nation.

Thirty lakhs on the right of saving Thrace, with its rich wheat fields so necessary to the future prosperity of Greece.

General Metaxas was prominent in the Balkan war, but never held political office. It is evident that Greece wishes to go to the peace conference with a strong hand, and the presence of a powerful army in Thrace will give her new important cards.

Venizelos Party Increased

The internal political situation is difficult because partisans of Venizelos have increased since the military reverses in Asia Minor. The Metaxas movement, however, is characterized by his friends as embodying a conciliatory attempt to inspire co-operation between the followers of the King and of Venizelos.

This program would not include the return of Venizelos to Greece, but would mean the raising of some of his supporters to the cabinet or diplomatic posts abroad.

Constantinople, Sept. 25.—The British officials announce that a Turkish force of 1,200 cavalry, which crossed the neutral zone at Chanak Saturday night, retired Sunday on Bairamlik, following a meeting at 6 o'clock Sunday morning between the commanders of the Turkish and British forces. No shots were fired. The Turks retired under a white flag.

British Halt Turks

The Turks stopped their advance when the British notified Turkish commander that a further forward movement would cause the British to open fire.

The Turkish ultimatum allowed until 5 o'clock Saturday afternoon for guarantees of the return of Thrace, and it was because no guaranties were forthcoming that the Turkish cavalry crossed the border.

HEALTH SERVICE TAKES NEW SITE

The Health Service staff is moving into its new headquarters in the building just south of the Homeopathic hospital and expect to be equipped to care for the students as soon as school opens.

The new building is much more modern than the one formerly occupied by the Health Service. There are better heating, lighting, and ventilating facilities. The waiting room, which will be used by both men and women, is to be in the sun parlor. The women, by this arrangement, will have the same advantage of consulting the physicians as the men.

A new feature is the Health Service infirmary, recently established. There will be 20 to 25 beds on the second floor which will be used to care for temporary illnesses which heretofore have received attention at the rooms of the students. There will be more treatment rooms which will be open on the first floor where all of the doctors' dispensary work will be done.

Doctor Reynolds and Doctor Klingsmith will head the new doctors on the staff. Both men have been connected with this kind of work at other universities. Doctors Miller and Edmonds, formerly of the staff, have gone into private practice.

According to Doctor Forsythe, director of the Health Service, the students will receive medical attention which approaches the ideal, and at a small expense equalled in very few, if any, comparable communities or groups.

E. C. Glover Returns from Columbia

Professor Clifford C. Glover of the pharmacy department, who was on leave of absence last year studying at Columbia university, has returned and will teach pharmacology. He will also act as secretary at the college.

Summer Faculty Concert Pleases

Variety of selections, rendered by musicians of great artistic ability, characterized the summer series of faculty concerts which were held in Hill auditorium every Wednesday evening during the summer session of the University. The artists were largely of the faculty or graduates of the University School of Music.

The summer musical season was opened on June 28, when Harry B. Evans, organist, Otto D. Parton, tenor, and Emily Muther, violinist, were joint soloists before a large and appreciative audience. Among the prominent artists who provided vocal or instrumental entertainment during the summer are Mrs. George B. Rhead, of the piano department of the School of Music; Mr. William Wheeler, head of the vocal department of the same school; Anthony J. Whitmire, acting head of the violin department, and Mr. Carl Lindegren, baritone, head of the department of the Michigan State Normal college.

The closing concert was given August 7. The Summer Choral union gave a fine rendition of Every's "Banner of St. George," under the direction of George Oscar Bowen, head of the public school music department of the School of Music.

Practically all of the concerts were well attended.

BUILDING PROGRAM ADVANCES RAPIDLY

Model High School and Engineering Shops Pass Foundation Stage

CLEMENTS LIBRARY TO BE COMPLETED ABOUT NOV. 1

The building program of the University of Michigan took material steps toward completion during the summer months as the Engineering shops and Model High school passed beyond the foundation stage and the excavation was prepared for the new physics building. The exterior of the Clements library also was completed and the decorating, interior work, finishing touches on the whole building. Shops situated on East University are all that remain to complete it.

Excavations for the Engineering annex across from the Engineering building, were begun on June 23. Since that time the excavations have been completed and the foundations and frame work laid.

Clements Library Nears Completion

The Clements library will be completed before Nov. 1 if work now under progress continues as planned. The building, situated on South University avenue, was started in advance of the other buildings under construction. It is designed in the period of architecture typical of the Italian renaissance period, the principal stonework on the exterior being along these lines and the interior as already constructed, showing the same situation there. The building is the gift of Regent William L. Clements, '85, and will be used to house the historical collection of books that he is presenting to the University.

While excavations on the new Model High School on East University immediately south of South University were started later than were the others, this building is well under way and work is being rushed in the construction of the foundations and framework.

Physics Building Under Way

The new Physics building, on the site previously occupied by the automotive branch of the engineering building, is under way. The first of the foundations were laid last Friday and the excavation, which reaches 35 feet into the ground will house three sub basements to the building. It is nearly completed.

The time for the completion of the buildings under way, while still entirely indefinite, has been approximately set as August, 1923 by Prof. John P. Shepard who is in charge of the building program. While this date is subject to change due to the conditions that surround the construction, it is probable that the buildings will be completed at about this time.

Work on the buildings has been very little held up by the economic and labor situations in the United States during the summer. Professor Shepard stated yesterday that while many concerns throughout the country were stranded in construction work due to the lack of materials caused by the railroad strike, the contracting firms who are erecting the University structures experienced little or none of this difficulty and work continued with scarcely any interruption.

Great Lakes Ships to Burn Oil

Detroit, Sept. 24.—The South American and North American, great lake steamers, are being converted from coal burners to oil burners. They are the first lake vessels to be converted to oil burners. About six weeks will be required to make the change, the work being under way in a local ship yard.

CHILDREN CRUSHED WHEN THEATER FLOOR COLLAPSES

Strand theater, Pittsburg, showing hole in foyer where floor gave way.

Police and city authorities of Pittsburg are probing the Strand theater disaster which resulted in the death of one child and the injury of thirty-eight others. The concrete floor gave way as fifty children waited at the door for admission to the picture show. The picture was "The Trap."

Two Articles by Prof. Van Tyne Appear in Atlantic Monthly Numbers

Conclusions on the Indian situation, resulting from a thorough study under the most favorable conditions, are the substance of a series of two articles by Prof. C. H. Van Tyne, head of the history department, appearing in the July and September issues of the Atlantic Monthly.

Under the provisions of the Government of India Act, enacted in 1919, a legislative council of two houses, with the majority of the members freely elected by the Indian constituencies, has been established to assist in the government. In theory the government is not responsible to this body, but in practice the fear of wrecking the new scheme which they have created has lead those in power to concede to its wishes.

Two phases of the plan, hardly comprehensible to the American mind, are "communal representation" and what is termed "dyarchy." The former provides, instead of our proportional representation, a means for the representation of certain Indian minorities, the Sikhs, the Parsis, the non-Brahmans, the Mohammedans, the European business interests—greatly out of proportion to their numbers. The latter is the division of the "functions of the provincial government into reserved and transferred subjects," giving charge of peace, order, and good government to the Governor, as of old, and passing over the promotion of education, sanitation, and public works to the Indian Legislative Council.

Not Ready for Democracy

Professor Van Tyne is certain that India is not ready for our ideas of democracy, and says, "Anyone who imagines that India is ready for our democratic ideas of rule by a majority should read the addresses presented to the Montagu Commission. * * * It is as if the Christian Scientists, the Scandinavians, the Jews, the tobacconists, the Greek shoeblacks of the United States should protest against their majority interests being left to the mercy of a majority decision in the American congress.

"Those who devised the Government of India Act frankly say that their purpose was to give Indians experience in self-government while providing, during the immediate future, against any foolish or inconsiderate acts injurious to Indian or to British interests.

Lack Efficient Administration

Professor Van Tyne had the opportunity of visiting the Indian Legislative Assembly in session at Delhi. The brilliance of the Oriental costume made it a picturesque occasion. He was astonished at the oratorical and reasoning ability displayed in their debates, but declares, "They will need years of experience and drill before they can give the concentrated attention, the ceaseless watchfulness, the devotion to details, the tireless hour after hour, day in and day out attention which makes an efficient administration.

Judgments passed on the Act are many and varied. The young Englishmen in the diplomatic service regard the giving of responsibility to the Indians as a death knell to their ambitions, the rest of the official class look upon it with favor, the European and American merchants are eager to preserve the old regime and look with disfavor on the Act, and the majority of the princes are enthusiastic over the scheme.

Professor Van Tyne considers that all the people might be divided into four classes—the conservatives who fully realize the difficulties of the situation and approve of the plan as the best solution; the moderates who hope for more; the nationalists who are looking for further concessions through the medium of the Legislative Council, and the followers of Gandhi who would attain the same end by non-cooperation with the government.

One Outstanding Leader.

The outstanding leader of the Indian masses for the last few years, according to Prof. Van Tyne, has been Mohandas Ramanchand Gandhi. He plays upon the religious fervor of the people, their outstanding characteristic, and is considered a holy man. There is no doubt as to his sincerity, his absolute certainty that India "is the holy ground of God, and under the English feet but under that of modern civilization." He would use "love-force, soul-force, or passive resistance" to overcome the opposition. In spite of his beautiful personality Gandhi is a real danger to the welfare of India and his arrest by British authorities was justified.

Need British Rule

"The only unity India enjoys," he says, "is the gift of British rule. It has beyond question brought India nearer to political competence and national unity than she would in all reason have been without it. * * * If the British ultimately leave suddenly, without preparing the Indians through a long period to assume the burden of government, untold chaos would result.

"This great imperial problem must be solved in India. It is not within the power of any party in England to arrest movement of political opinion in India. In the present stage, the temper of that opinion is one of the vital factors; and any attempt to reassert the control of the Imperial Parliament too obviously will have a bad effect."

ENGINEERS WILL HEAR PLUNKETT AT SMOKER

GREAT WAR HERO TO BE CHIEF SPEAKER AT THURSDAY MEETING

Admiral Charles B. Plunkett of the United States navy, hero of the Great War, and at present the president of the Board of Inspection and Survey of the United States navy, will be the principal speaker at the initial smoker of the Engineering society in the assembly hall of the Union next Thursday night.

During the recent war Admiral Plunkett had charge of the 14-inch naval gun batteries in Flanders. In the course of his command a shipment of unassembled guns arrived without the blueprints. It being essential that these batteries be in commission immediately, he performed the unparalleled feat of assembling them without the blueprints. In recognition of his services he was awarded the United States D. S. M. Previous to this, during the Mexican war, he was in command of the U. S. S. South Carolina, which patrolled the Mexican coast.

Admiral Plunkett will arrive in Ann Arbor Wednesday.

FORMER PENN ATHLETE HERE AS CHURCH PASTOR

Rev. Henry Lewis, recently assistant at the Church of the Holy Trinity, 22nd St. and Lennox Avenue, New York City, has arrived in Ann Arbor and assumed his duties as rector of St. Andrew's Episcopal church, Division and Catharine streets.

Mr. Lewis, although a graduate of the Berkeley Divinity school, completed a course at the University of Pennsylvania before enrolling in divinity. While at Penn he made a name for himself as an athlete and when the Pennsylvania football team defeated Ann Arbor in 1915 he kept the end line on Perry held.

The St. Andrew's rectory is at present being renovated and made ready for its new occupant. Mr. Lewis has established a temporary residence at 721 E. Kingsley street, the home of Mrs. John Lawrence.

EFFORTS OF BOOSTERS BRING ELECTRIC GRID

FOREIGN GAMES TO BE FLASHED PLAY BY PLAY ON NEW SCORE BOARD

An innovation in the portraying of football games on foreign territory will be inaugurated here at the time of the Michigan-Vanderbilt game this year. Through the efforts of the Boosters association, an electrically-lighted play-by-play gridiron has been presented to the Booster committee on athletic affairs, of which Arthur B. Davidson, '25, is chairman.

The board is known as the "Gridiograph," and is manufactured by a Mr. Jamahas O. Somers. At the top of the board the quarter is shown by means of a circle of lights and the division of the circle into numbered quarters. The board is elliptical in shape.

Lights Show Position of Ball

Around the top edge the score and the downs are shown. In the center is a properly proportioned gridiron, where the position of the ball is shown at all times by means of lights. The instant a play is made it is reflected on the board and a light flashes on beside the name of the player who is carrying the ball. The names of the opposing team are shown at the sides of the gridiron. Below the gridiron the exact nature of the play in progress is indicated. For example, when a forward pass or a kickoff or a touchdown is made a light flashes on beside the particular play that is made.

As yet, according to the committee, the exact location of the board is uncertain. It is thought that the reproduction will be shown in Hill auditorium in inclement weather. When weather permits it may be shown in Ferry field.

Union Registration Shows 2,500

Registration at the Union last night showed that a total of approximately 2,500 students had signed up with this organization. The office on the first floor lobby will keep open for some time to enable the late comers who have so far neglected to do so to enroll.

The total registration of last year indicated that 4,500 enrolled. It is expected by those in charge that this number will be equalled by this year's registration.

HOSPITAL MERGER MAKES NO TROUBLE

The merger of the Homeopathic and University hospitals has been made, and apparently no insurmountable difficulties have as yet been met, according to D. W. Springer, superintendent of the Homeopathic hospital department.

According to the new arrangement the north end of the Homeopathic hospital is to be reserved for Homeopathic medical cases, and the south and middle wards are to be used for convalescent cases.

The children who formerly occupied the place now occupied by the Health Service have been moved to the Homeopathic hospital proper and to the University hospital. Those needing only medical attention have, for the most part, been moved to the north end of the Homeopathic hospital, where they are cared for in a suite of rooms.

Every day at 10 o'clock in the morning and 3 o'clock in the afternoon Dr. Hugh M. Brooks carries on diagnostic clinics at the Homeopathic hospital to decide whether the patient is to enter the University or the Homeopathic hospital.

SUMMER DAILY IS MARKED SUCCESS

First Paper of Kind in Any American University is Well Received

BURTON AND KRAUS SPEAK HIGHLY OF NEW VENTURE

Pioneer in its field as the first college summer daily paper to exist, The Summer Michigan Daily completed its initial year with marked success, assuring it as a permanent institution in Michigan's publications. It was the first attempt made by any university summer school in the country to give its students daily news.

The Summer Daily became a reality last spring through the efforts of Leo J. Hershberger, '23, and Harold C. Ruel, '23 Ed, who had been previously elected managing editor and business manager respectively of the 1923 Michigan and who petitioned the Board in Control of Student Publications for permission to change the summer paper to daily. This permission was granted.

Is First Year Round College Daily

This step gave Michigan the first all year round daily paper of all of the universities in the country.

The Summer Daily of the past Summer session was the experiment, tried to determine whether this new departure in policy would be successful. As most of the readers of the Michigan Daily, commencing only a week after that publication closed its offices, The Summer Michigan Daily came out during Commencement week with three extras giving the Commencement address by Charles Evans Hughes, Secretary of State, graduation news and general news for the benefit of the Commencement crowds and alumni.

Two weeks later the Summer session opened and from then on the Summer Daily ran successfully six days a week, putting out in all a total of 45 issues, up to the closing of school Aug. 17.

Advertising Tripled

The circulation of the new paper reached nearly to the thousand point showing an increase of fifty per cent over the previous summer edition. The advertising was tripled and the Associated Press service was doubled, twice the space that it had been previously allowed, giving the paper much more outside news.

According to the editors of the Summer Daily and commenting on the paper President Marion L. Burton said, "It is needless for me to say to you that I have read every copy of it with the greatest interest and it has kept me in fine touch with the development of affairs at the Summer session. I want to congratulate both of you upon the success of the first experiment with a Summer Daily. I imagine there will be no further discussion about the subject and that in the future it will be published daily as it has been this summer."

A letter from Dean Edward H. Kraus of the Summer session voices the same opinion. The Dean writes, "I am heartily glad that the success of the summer publication on a daily basis has contributed much to the development of the best spirit among the student body as a whole. That the Summer session has had this publication is inclement weather. When weather permits it may be shown in Ferry field.

Union Registration Shows 2,500

Registration at the Union last night showed that a total of approximately 2,500 students had signed up with this organization. The office on the first floor lobby will keep open for some time to enable the late comers who have so far neglected to do so to enroll.

The total registration of last year indicated that 4,500 enrolled. It is expected by those in charge that this number will be equalled by this year's registration.

BIXON, '23D, KILLED BY POLICEMAN IN HOLDUP SEARCH

Charles D. Hixon, '23D, was shot and killed by Patrolman Walter Storch July 5 in Detroit. A coroner's jury held that Hixon "did not obey commands from an officer in fear of his life while investigating a holdup." Storch declared that he fired at Hixon when the latter reached toward his hip pocket, presumably to draw a weapon, after having been ordered by the officer to throw up his hands. Hixon was unarmed.

ARMY AIR BOARD TO PROBE FATAL PLANE DISASTER

CRASH CONCEDED MOCK ATTACK IN CLOUDS CONTINUES TO LIVES

CAUSE OF ACCIDENT MAY NEVER BE DETERMINED

Minic Battles Lasting Several Days Discontinued When Cpnl. Silpo Is Tragic End

Minneola, N. Y., Sept. 24.—Preparations were under way today for an army board inquiry into the crash of a Martin bombing plane, which killed six army men at Mitchel field Sunday night in the conclusion of the simulated attack on the east coast by the cantonment. Major Gen. Mason Patrick, commanding the Army Air service, will appoint a board of army officers Monday and an inquiry into the crash, the cause of which, it is said, probably never will be known.

One of the six victims, it was reported unofficially at the field, was a stowaway. Those killed were:

List of Killed

First Lieutenant Raymond H. Dahl, a regular army pilot of Lake Charles, La.

First Sergeant Thomas Bendell, of Chicago.

Corporal David H. Shreve, New York.

First Class Private Edward Kane, who left no home address.

Private Henry J. Nichols, route 2, Carr Hill, Tex.

Private Irving M. Widmer, of Ashburnham, Mass.

All but Lieutenant Dahl were stationed at Mitchel field.

Widmer, it was unofficially reported at the field, was a stowaway. An unofficial check up of post assignments of the victims of the tragedy failed to show that he had been assigned as one of the men to man the bomber in the single turn of the field.

The point most often stressed by army officers in discussing the tragedy is that the Martin bomber was in the field of powerful searchlights which were used in the army's defensive forces in the maneuvers. It was said that the pilot could have become blinded by the reflection of the shafts of light which cross-crossed the dark skies.

Discount Mist Theory

Officers of the field said that the purple fund mist which drifted down Long Island had in each way confused Davis, who was recognized as one of the best officers of bombing planes in the air service.

"Just another one of those air tragedies which probably never will be explained," Major Wooter said in his brief official announcement of the accident.

The flight of the Martin bomber was scheduled as a single turn of the field in order to give officers of the reserve corps, for whose benefit the maneuvers are being held, an idea of the low visibility of a plane, even the size of the Martin bomber, at night.

The 12-hour fleet mock attack, it appeared, had been accomplished. The searchlights were at the regular 30-degree angle, it was said, so that they in no way confused the pilot. With the hangar lights all inside him, Lieutenant Davis suddenly banked his machine in preparation for landing. At the top of the bank, when the wings of the plane were almost perpendicular, the bomber suddenly side-slipped and fell. A yellow flash of light cut the dark for a moment as every instantaneous object on the plane burned. The bomber struck the earth and her two motors were open. The impact as the nose of the plane tore into the ground is reported to have shaken a house building nearby.

Motorist Reaches Wreckage

The field in which the bomber fell is between the Long Island estate of Alexander Smith-Cochrane and the Meadow Brook Fleet club. The first person to reach the scene after the crash was a motorist who was driving on a nearby turnpike. Three of the bodies had been thrown clear of the wreckage. When the first army officer reached the scene two of the men still were breathing. They died before reaching the army hospital.

The bodies of Davis and Corporal Bendell were burned beyond recognition. It was said by physicians at the hospital that Davis' body was in such a condition that it would be impossible to determine whether or not he had been overcome while banking his plane or that his death had resulted from the crash. Kane, found at the side, slipping off his flying clothes, was thrown from his inability to operate the giant bomber.

Photographs is reported to play a large part in the inquiries to be conducted into the accident. One of the Fourteenth Photographic section, headquarters at which is at Mitchel field, were on the machine just before taking night pictures of the Long Island area for records at Washington. A picture was made. It was said, of the bomber the moment she banked. Photographic aides were ordered to the wrecked plane after the wreckage was cleared away. Before it became, however, hazing for souvenirs, who

TRY FOR THE CROSS COUNTRY SQUAD

VOL. XXXII. No. 15 EIGHT PAGES ANN ARBOR, MICHIGAN, WEDNESDAY OCTOBER 11, 1922 EIGHT PAGES PRICE FIVE CENTS

NEAR EAST PEACE LOOMS AS POWERS RATIFY ARMISTICE

GREEKS WILL EVACUATE EASTERN THRACE WITHIN FIFTEEN DAYS

GREEKS SIGN ONLY AFTER TURKS AGREE

Calls Transfer Under Allied Mission and Forces Provisionally Occupying Thrace

(By Associated Press)

Mudania, Oct. 10.—The armistice convention was signed here tonight at 11 o'clock. The representatives of all the powers concerned affixed their signatures to the revised protocol, which General Harrington had printed for acceptance to Ismet Pasha and which the nationalist delegate forwarded to the Angora government for its decision.

General Harrington had informed Ismet Pasha that the convention embodied Great Britain's last word and that the other powers gave their unqualified support to the terms.

Ismet Replies for Turks

On his part Ismet had replied that he hoped his government would accept the conditions set forth and promised a reply by five o'clock in the evening. To the meantime the British commander returned to Constantinople, where he remained until early this afternoon, proceeding then to Mudania on the Iron Duke to hear the Turk's decision.

The convention, consisting of 14 clauses, is drawn on liberal lines showing strongly traces of French influence on the side of the Kemalists.

Turks Leave Thrace

Under it the Greeks will evacuate Eastern Thrace within 15 days and complete the transfer to the Turks in an additional month. The Turkish civil administration will follow close on the heels of the departing Greeks, the latter being placed under the supervision of the allied mission and allied forces provisionally occupying Thrace, but exceeding seven battalions. The number of Turkish gendarmerie and police permitted thereafter is left undefined to the discretion of the Kemalists subject to allied approval.

The Turks, on their side, undertake not to place an army in Thrace unless peace is ratified while no neutral zone will be delimited by fixed commission.

Greeks Send Orders

The Greek government, replying to the request of Col. Mazarakis at Mudania for instructions had wired him to sign the armistice convention only if the Turks signed.

Athens, Oct. 10.—Martial laws was proclaimed in Athens tonight. This action has been taken to prevent hotheads in the army from opposing the government's decision in accepting the loss of eastern Thrace.

A degree of martial law, signed by Constantine on the eve of his evacuation was not made operative because of the fall of the government.

GROESBECK ASKS STATE POWER TO CONTROL FUEL

STATE LEGISLATIVE BODY MEETS IN SESSION TO CONSIDER COAL QUESTION

Lansing, Oct. 10. — The Michigan legislature met in special session today to deal with the coal problem and was requested by Gov. Alex J. Groesbeck to enact a law that would give state officials power to control the price and distribution of fuel, as well as the profits of dealers.

The terms of the bill, drawn by the state administration, brought strenuous objection from the coal interests in Detroit, Flint and other cities, and a public hearing was set for tonight. Following the hearing the house committee on state affairs will take up consideration of the measure. Under the proposed law the governor would proclaim a fuel administrator and delegate to him complete control of coal distribution. Coal would be rationed through county administrators. Dealers' licenses would be subject to cancellation for violation of the administrator's orders, and a fund of $200,000 would be established which the state could, if such action were deemed necessary, purchase and sell coal direct to the consumer. The administrator also would have power to fix a maximum price for coal and regulate profits of dealers who would be forbidden to sell more fuel to one consumer than was required for immediate use.

In his communication the governor

(Continued on Page Two).

There will be a meeting of the Cubs club at 5 o'clock today.

Near East Race Plans Are Halted At Peace Meeting

Henri Franklin Bouillon

The peace plans of Henri Franklin-Bouillon, French envoy and father of the Mudania conference, have been halted by the disruption of the meet over peace conditions demanded by the Turks. The discussions may never be resumed.

BURTON TO OPEN SUNDAY SERVICES

"Living on a War Basis" Topic Chosen By President For Initial Assembly

DEAN MARQUIS SECURED TO SPEAK AT SECOND ASSEMBLY

Pres. Marion L. Burton will speak on "Living on a War Basis" at the first University service to be held at 7:30 o'clock Sunday evening in Hill auditorium under the auspices of the University Services committee. Burton Dunlap, '23, chairman of the committee, announces that complete arrangements have been made for the service, and that it will last one hour.

The idea of the University services was initiated in 1919, and since that time has crystalized into a popular custom. The average attendance at the opening meeting has been more than 2,000 and the attendance at them throughout the year has averaged more than 2500.

It is aimed to secure a man of national repute to address all services, one who will talk of religion in a definite, tangible way.

Dr. Samuel S. Marquis, former dean of St. Paul's cathedral at Detroit, and now rector of St. Joseph's Episcopal church in Ann Arbor, will speak at the service following the one Sunday.

Suitcases Left As Tickets Are Saved

"They have the papuhs, but we have the chee-ild," the motherest line in all melodrama aptly pictures the situation in which Fielding H. Yost, Paul Goebel, '22E, and Irwin Uhrig, '23, crusaders extraordinary to the Ohio-Wesleyan football classic last Saturday, found themselves as the Columbus Ohio Union depot began to fade in the distance.

They had a block of 13,000 tickets for the Ohio-Michigan scrabble, valued at $45,000 (it is true—but they had left their jaspolegies to Ring) costly suitcases in the station waiting room.

The papuhs," represented by the suitcases containing extra collars and whatnot had certainly shipped out of their possession, but the "chee-ild," that coveted block of tickets, were safe in Fielding's inside coat pocket, or chained to his wrist—at any rate they were safe.

STAGG FROWNS ON COLLEGE GAMBLING

Chicago, Oct. 10.—In a letter to the fraternities and other organizations of the University of Chicago, A. A. Stagg, athletic director, today urged the undergraduates to stamp out betting and countenance gambling, particularly as it applied to football. There are two kinds of betting, he said: "One in which the student bets under the impression that thereby he expresses loyalty to his school, the other in which the student thinks he can make some easy money."

Both are harmful to the student and the university, he said. Betting was condemned by Western Conference officials meeting here last September.

Call for Track Manager Tryouts

Sophomore tryouts are needed for track manager. Report any afternoon this week to the assistant managers in the lower locker room of Waterman gymnasium from 2 until 4:30 and second semester freshmen are eligible.

Woman Chorus In Matinee Musicale

Matinee Musicale is organizing a women's chorus which will do unaccompanied choral work this season under the leadership of Mr. Frederick Alexander of Ypsilanti, according to an announcement made yesterday by Mrs. Harry Bochar, president of the society. The members of Matinee Musicale, which is composed of about five hundred women musicans of Ann Arbor, are showing such a keen interest in the formation of the chorus that it promises to become one of the leading activities of the society during the year.

Membership in the chorus will be limited to approximately thirty, and all who are interested should communicate immediately with Mrs. W. S. Mowor, chairman of the program committee, at 930 Forest avenue.

The first meeting of Matinee Musicale will be held at 2:30 o'clock Wednesday afternoon, Oct. 18, in the Michigan Union assembly hall.

HAMMOND HEADS COAL FIELD SURVEY

President Announces Personnel of Body Which Will Investigate Fuel Industry

MINE OWNERSHIP TO BE INVESTIGATED BY COMMITTEE

(By Associated Press)

Washington, Oct. 10 — President Harding today announced the personnel of the commission which is authorized by an act of congress to make an exhaustive investigation in both the bituminious and anthracite coal fields with a view to recommending legislation designed to bring tranquility to this industry.

John Hays Hammond, of Washington, an internationally known mining engineer, heads the list. The other members are: Former Vice-president Marshall, Alexander Legge, of Chicago, Clark Powell, editor of the Atlanta, Ga., Constitution, George A. Smith, director of the United States geological survey, Dr. Edward T. Devine, New York City, and Charles T. Neill, manager of the bureau of information of the Southeastern Railways.

The commission will meet in Washington within 10 days for the purpose of organizing, it was stated at the white house. It is expected to hold hearings both in this city and in the various coal fields and is required under the Borah-Window act to make its first report to the President and congress not later than next Jan. 15. This report will deal with the bituminous industry, but a separate report of the anthracite industry would be required on or before next July 1.

Among other things the commission will enquire into the ownership and title of mines, the traces of coal, organization and persons connected with the industry, both in production and distribution, labor conditions, wages, wage contracts, waste and a regular production.

NATION NOW SAFE FROM RAILWAY LABOR CRISES

CONFIDENCE IN NEW ERA IN WAGE AND WORKING AGREEMENT EXPRESSED

(By Associated Press)

Cleveland, Oct. 10.—Methods of settling wage and working agreements between the Big Four transportations brotherhoods and the railroads has entered a new era, and if the present course of negotiations is continued the country for several years at least will not be threatened with a complete tie-up of railway transportation through a concerted strike of these brotherhoods on all lines of the nation, W. G. Lee, president of the brotherhood of railroad trainmen, said today.

The centralization of all wages, rules and working negotiations and the return to the system prevailing for 20 years prior to the time when the four train service brotherhoods were forced by the eight hour fight to pool their strength into what has since become famous as the "Big Four" brotherhood has already set in, Lee declared.

This whole business, with all railroad labor unions on one side and all railroads on the other, with the railroad labor board in between got too big for any one man or a few men to handle. No sane government would permit any faction or class to tieup the transportation lines of the country and thereby punish the innocent who are always in the majority. The only way out was to separate.

Chimes Calls Tryouts

Tryouts for the editorial side of Chimes may report to Edward McCobb, '23, between 1 and 3 o'clock any afternoon of this week in the activities room of the Union. Sophomores and second semester freshmen are eligible.

ALUMNI INSTALL ELECTRIC SCORE BOARD FOR GAMES

MINATURE FOOTBALL FIELD IS LARGEST OF ITS KIND PRODUCED

FEATURE TO BE PLACED IN HILL AUDITORIUM

Plan to Show Play by Play Results of Vanderbilt Game Saturday

Plans for the installation of an immense electric football score board, known as a grid graph, which will be placed in Hill auditorium where it will enable thousands of Michigan students to see their team play away-from-home games, have been completed by the Alumni association of the University.

This miniature football field, which is said to be the largest electrical football score board ever made, will be brought to Ann Arbor by the association to allow the students to see their Varsity play in all of its outside contests.

Will Help Homestaying Students

"Most students cannot follow the team in its invasion of other fields," said Paul A. Leidy, '09, of the Alumni association, who together with Wilfred B. Shaw, '04, Secretary of the Alumni association is managing the obtaining of the board, "but by means of this electrical apparatus they will be able to watch the team in all of its games, play by play, and in every detail."

Permission to use Hill auditorium for the installation of the board was granted bythe Alumni association Monday by the Board of Regents. It is thought that this will allow the largest possible crowd to assemble in one place, where they may view the indicating lights on the board.

It is expected that both the electrical apparatus and the board will arrive today, which will allow it to be assembled and in the auditorium by Friday night. The Vanderbilt game next Saturday, will be the opener for the new electric board. From then on it will be used for all the outside games, the Ohio State game, Oct. 21, and the Minnesota game, Nov. 25.

New Kind of Machine

This electric score board, which is in reality a miniature football field, is made by the Potter and Howard Company of Columbus, Ohio. This is the second year it has been on the market and from the results it is said to be the best obtained game record made.

Last year the results from the Ohio State-Chicago game were shown through this indicator before a crowd of 6500 people at the Coliseum in Columbus. The game was played in Chicago but the crowd in Ohio saw each play recorded almost instantaneously after it took place, it is said.

Returns play by play of the Washington and Jefferson-California game at the Tournament of Roses in Los Angeles were sent across the continent and recorded on the grid graph before a crowd of 1500 students in Washington, Pennsylvania. This distance is said to be one of the fastest through which a play by play football game has ever been recorded.

The board itself is controlled entirely by electricity and may be operated by one man. It is in the shape of an immense football, eleven feet wide and fifteen feet long, with a gridiron marked off with five yard lines by lights. There are other lights for each player and still others designating different plays. Thus when a play is made, the ball is moved down the field the corresponding distance, and the different lights at it, telling the amount of yardage gained, the man carrying the ball, and the type of play used.

For the Vanderbilt game this coming Saturday a special wire will be leased, running directly from Dudley field at Nashville to the board operator in Hill auditorium. As there will be no relays, but a through line all the way from the scene of action, the crowded in the auditorium will see each onecated spot the board at almost the same instant that it actually takes place on the field.

Other plans for additional features, during the returns from the game Saturday, are being planned, Mr. Leidy said. These, if they materialize, will be announced later.

MORTARBOARD DECIDES TO GIVE FUNCTION FOR SENIORS

Mortarboard, honorary society for senior women held the first meeting of the year on Monday evening at Martha Cook building. It was decided at this time to hold several functions during the coming season, the first of which will be a tea for all senior women. The date will be decided later. Arrangements were also made for holding the meetings on the second Tuesday of each month.

Freshmen Feature In October Chimes

Freshmen features will predominate in the issue of Chimes, the campus opinion monthly, that will be placed on sale on the campus this morning. The cover is in three colors showing a member of the class of 1926 passing before the senior benches. It is drawn by Halsey Davidson.

Another of the features of the issue devoted exclusively to freshmen is a poem entitled, "A Fable for Frosh." The fable was written by Hardy Hoover, '23.

Football also places in the articles published. "Fight 'Em, Boys—Fight 'Em-Y' Know" is a series of three descriptions of famous Michigan football games of the past written by J. Fred Lawton, '11; Clifford Sparks, '20, and Coach Fielding H. Yost. A spread of photographs of the present team in action is also used.

Two of the principle articles of cam-

CLASSES VOTE TO RETAIN NOMINEES

Poor Attendance at Sophomore and Junior Lit Meetings Results In Postponement

28 LAWS ARE ONLY CLASS TO ELECT NEW CANDIDATES

Members of the senior law class voted to retain the nominations made at the last meeting of the class held for that purpose last week. It was decided that those selected for candidacy for the class officers would stand as voted at that time. They are as follows: for president, M. R. Norcop and F. Wynn, for vice-president, Joseph Hoyle and L. R. Williams, for secretary, G. W. Rouse and Gladys Wells, for treasurer, R. L. Stuart, and G. K. O'Brien.

Will Circulate Petition

At their meeting the junior law class expressed themselves in favor of retaining the nominations of the first meeting. In order to ascertain the wishes of the entire class on this matter, many of whom were unable to attend the meeting, the election committee of the student council will today circulate a petition among the members of the class which, if a sufficient number sign, will be presented to the council at its meeting tonight.

In accordance with the council plan, the same question was put before the meeting of the freshman laws. They voted to reject last week's nominations and selected new candidates for office. These will be announced in the Daily as soon as their eligibility can be settled.

There was a decided increase in the attendance at the senior literary meeting which was held yesterday. New nominations for these officers are as follows: for president, R. Gibson and R. Hall, for vice president, Bruce Welkheifer and J. Van Alstyne, for secretary, Elizabeth Hoyt and Elizabeth Forsythe, for treasurer, Burton Dunlap and Lawrence Snell.

Literary Nominations Postponed

On account of the poorly attended meetings of both the junior and sophomore literary classes, meetings for the nomination of officers for these classes will have to be held at another time. The time and place of these meetings will be announced later.

All of the law classes and the senior literary class will hold elections from 3 until 5 o'clock Friday in the Law building and University hall respectively. Every member of these classes is especially urged to cast a ballot sometime during these hours.

BURTONS AT HOME TO FACULTY TODAY

President and Mrs. Marion L. Burton will hold their first "at home" of the season from 4 to 5 o'clock this afternoon, when members of the faculty, staff and townspeople will be received.

In the receiving line will also stand several of the full professors who have joined the University faculties this fall, and their wives.

The reception today, which is primarily for the faculty, staff and townspeople will be followed on the next three succeeding Wednesdays by receptions to freshmen women and their junior advisors. Mrs. Burton at this time will be assisted in the receiving line by Dean Jean Hamilton.

Announcement will be made later of the dates when President and Mrs. Burton will be at home to the students of the University.

Will Test Grain Trade Act

Chicago, Oct. 10—Directors of the Chicago board of trade voted this evening to test the constitutionality of the grain trade act which vests in the secretary of agriculture the power to regulate dealings in future deliveries of grain.

Appointed New Polish Minister To United States

Dr. Ladislaw Wrobleski

Dr. Ladislaw Wrobleski, formerly Polish minister to England, has been transferred to Washington, according to dispatches from the capital. He will arrive in the U. S. next month. Former Foreign Minister Skrzynski will replace him at the Court of St. James.

COUNCIL CHANGES COMMITTEE PLANS

Underclass Organization to Have More Power Under New Rulings

WILL ACT WITH COUNCIL IN ENFORCING RULES

New plans for the work of the Underclass Conduct committee which will materially change the nature of its work, have been drawn up under the direction of the student council. Under the new plan a detailed and accurate record will be kept of each man brought before the committee.

According to the new plans, an executive committee of the Underclass Conduct committee and a committee representing the Student council will arrange a system by which a freshman will be identified and warned for his first offense, or possibly punished for it, and for his second offense be subject to probation, providing permission for such power is granted to the committee by the University.

A sub-committee has been appointed by the chairman of the committee to draw up a constitution which will exclusively govern the actions of the organization. Work on the constitution has already begun.

At the present time the committee consists of 20 members who meet at 7:30 o'clock every Tuesday evening to consider complaints. Twenty men will be added to the present committee after the class convened Friday. Complaints will be given to D. M. Suter, '24E, C. W. Bird, '25, W. W. Kerr, '25E, and George Vanderhoef, '25.

R. O. T. C. Reark Freshmen By Mail

Due to the small number of freshmen who have enrolled in the R. O. T. C. this year, circular letters are being mailed to all freshmen engineers, describing the courses in military science and tactics which are open to these students.

Letters describing the courses in infantry and artillery were to be sent to all freshmen enrolled in the literary college, but the names were not available, Major Brooks said.

Evans Selected As Soloist In Second Twilight Recital

Harry Russell Evans of the organ faculty of the University School of Music will appear as soloist at the second Twilight Organ recital of the year, to be given at 4:15 o'clock this afternoon in Hill auditorium. The general public, with the exception of small children, are cordially invited to attend. The recital will begin on time, and the doors will be closed during performances of the numbers. The program follows:

Sonata in C minor, Opus 59...Guilmant

I. Prelude

II. Adagio

The sonatas of Alexander Guilmant enjoy a unique popularity both with organist and audience. In addition to being exceedingly well written, they possess that "something" which makes one forget the harmony and counterpoint involved and feel only the vigor, dignity, grace or melodic beauty of the particular movement in progress. This sonata is in three movements—the first vigorous and declamatory, the second quiet and reflective; and the third, a fugue, which will be omitted from this performance.

Salvador...(Recessional) .....Federlein
Prelude and Fugue in C minor...Bach

This is one of Bach's early works characterized by freedom of form and brilliancy of style. The Prelude begins with a pedal solo and continues with a four note figure used constantly in the composition. The subject of the Fugue is one of the finest in organ literature. It is carried through the usual exposition, later giving way to a free fantasia, the composition ending with brilliant scale passages.

Catari! Catari! .....Carrillo
Pastels on Scotch Airs...MacFarlane

The list of medleys on recital airs is almost endless, and, from an artistic standpoint, most medleys are worthless. In his "Scotch Fantasia," nevertheless, MacFarlane has written an interesting and highly enjoyable work. "The Blue Bells of Scotland," "Annie Laurie," "Bonnie Dundee," "Through the Rye" and "Auld Lang Syne" are all used in the composition.
