# Students Must Elect Classes On Saturday

## Chairman Says Rules Were Installed To Distribute Classes More Evenly

(Continued from Page 1)

2 and 3 relating to the proportion of afternoon and Saturday hours) unless such copy be accompanied by the written approval of the Executive Committee."

The classification committee, Professor LaRue said, will not accept elections without Saturday classes unless the student has received the approval of the committee, yet to be set up, which will pass on the exemptions.

As a valid exemption he suggested a senior who might have to elect certain course to complete his graduation requirements, none of which permitted the scheduling of a Saturday class, in which case there would be no reason to make the student drop a course he needed merely for the election of Saturday hours.

Other specific exemptions in the report recommended the exemption of the astronomy department "because of the unique working hours of the faculty."

"The committee believes," the report concluded, "that as many as fifty per cent or even 25 per cent of students may have legitimate reasons for exemption from Saturday classes."

In addition to Professor LaRue, faculty men on the committee were Prof. Carl J. Coe of the mathematics department, Daniel L. Rich, director of classification, Prof. Howard M. Ehrmann of the history department, Prof. James H. Hodges of the chemistry department, Prof. Herbert A. Kenyon of the Spanish department, and Prof. Clarence D. Thorpe of the English department.

Appended to the reports of the committee was a study by Professor Rich of the probable distribution of three and four-hour classes. In a department having 40 four-hour sections, he suggested 21 morning sections on Friday, 12 on Monday, Wednesday, Friday, and Saturday, 12 on Tuesday, Wednesday, Thursday, and Saturday, and 15 on Monday, Tuesday, Thursday, and Friday afternoons.

For 80 three-hour sections, he recommended a division putting 27 sections on Monday, Wednesday, and Friday morning, 18 on Tuesday, Thursday, and Saturday morning, and 15 on Monday, Wednesday, and Friday afternoon.

# Eardley Will Join Alaskan Expedition

Prof. Armand J. Eardley of the geology department and Kenneth A. Gorton, Grad., will leave Ann Arbor next Friday for an extended trip as a part of an archeological expedition to the west coast and Alaska according to an announcement made yesterday.

Professor Eardley and Gorton will join several other scientists on the coast at Seattle where several of the men who will compose the personnel of the expedition are already assembled and engaged in making final preparations for departure.

The venture, which is sponsored jointly by the University of Pennsylvania and the National Research Council of the United States, has as its aim the conducting of investigations of the old immigration trails over which the Siberian Indians came in penetrating the western hemisphere. The findings, according to authorities, are liable to have a great bearing on the future course of archeological study along this line.

Starting from Seattle the expedition will proceed north into Alaska, investigating such situations en route as may be regarded as being of interest. In Alaska, after an exhaustive cataloging of the possible routes of migration, the party will proceed with its research work as previously outlined. While no definite limits have been imposed as to the locality in which the major part of the work will be conducted, it will, according to Professor Eardley, be centered in the lower Yukon area.

# Chain Letter 'Factories' Swamped By Missouri Fans

—Associated Press Photo.

**The chain letter craze reached a new high in Springfield, Mo., where fans flocked to "factories" to have their contributions of $2 and $5 notarized. One of the establishments, with notaries aiding participants, is shown jammed with society women, maids, clerks and retail business men who joined in the rush. Many discovered after the craze died down they were out from $1 to $50.**

# R.O.T.C. Takes Prominent Part In Annual Open House Display

EDITOR'S NOTE: This is the last to a series of articles dealing with the exhibits that have been planned for the Engineering Open House which will be held in conjunction with Spring Homecoming May 17 and 18.

By RALPH W. HURD

Two special attractions have been announced by D. P. Hesler, '36E, chairman of the committee in charge of R.O.T.C. exhibit, as part of the R.O.T.C.'s contribution to the Open House activities.

The first is that radio station WS AXZ, short-wave station operated by the Signal Corps, will be on the air during part of the Open House period. Visitors will be able to witness the broadcasting and reception of short-waves, and the operator in charge will explain the equipment used.

The second is that at 5 p.m. Friday, May 17, the R.O.T.C. Regiment of the University will hold a parade at Palmer Field. This parade will include a review and presentation of awards to members of the unit who have been outstanding for the year.

Exhibits of the corps will include field telephone switchboards and radio sets, machine guns, airplane flares, and the "Aberdeen Chronograph" for measuring the velocity of projectiles. The latter instrument will be operated during the Open House.

Plans revealed by the automotive department include two features that will be used both as exhibits and as "advertisements" for the Open House. The "bluebird" test car, an old Chevrolet remodeled on "box-car" lines to conform with wind tunnel experiments, will be parked on the State Street-North U. end of the diagonal, decorated with appropriate signs pointing to the engineering college. It is further hoped that the Glider Club will be able to bring in the "Franklin" glider and assemble it on the lawn in front of the Engineering Annex.

Professor Lay of the department has announced that he will shift all his laboratory classes for the preceding week to the two days of the Open House, so that all the various engines and apparatus in the department can be run for the benefit of interested visitors.

The chief feature of the aeronautical engineering department will be the operation of the University's large wind tunnel. A typical test model will be set up, and from ten to fifteen persons will be taken in at a time to observe the results of the tests.

The safety testing device used recently by the State Highway Department in Detroit's "Little World's Fair" to determine reaction times of more than 20,000 drivers has been brought to the University for the Open House and will constitute the major exhibit of the transportation department. Visitors will be given free trials on the device, and they may thus discover how long it takes them to move their foot from the accelerator to the brake of the usual car when a red stoplight is flashed.

# Bishop To Attend International Meet

Dr. William W. Bishop, Librarian of the University and head of the department of library science, and Mrs. Bishop left Ann Arbor yesterday for New York City where they will embark for Spain to attend the sessions of the International Congress of Libraries and Bibliographies in Barcelona.

Dr. Bishop is head of the International Federation of Library Associations, which, together with the Spanish government has planned and is calling this convention. The meetings are to be held from May 20 to May 30, and Madrid, Barcelona and Seville will successively be the headquarters of the visiting delegates. Different branches of the organization will hold their specialized meetings concurrently, but in the different cities.

# Reduction Will Be Effected In City's Budget

## Council Approves Figures Prepared By Committee In Special Meeting

A reduction of nearly $20,000 in the annual budget of the city of Ann Arbor was foreshadowed last night when the city council as a committee of the whole referred the budget to the council with a recommendation of approval at a meeting yesterday.

The budget will formally be submitted to the council at its next regular meeting May 20, as a result of the approval that was expressed at the special meeting. The chief item of the budget that held the attention of the council in its debate was the question of allowing two additional men for the police department.

"I'm not in favor of this increase," Alderman Max Krutsch stated.

"We have always got along all right, and I believe we can get along with the men we have; 30 policemen for this town is enough," the councilman added.

It has been understood that the two men, if added to the department, would be used for scout car duty. The value of this type of protection for the residential district of the town was discussed.

No changes were made in the first draft of the budget, which remains the same as when it was set up by the budget committee or the common council. Due to decreases in the estimates of expenditures submitted by several of the departments of the city a material reduction in the size of the total budget.

The total this year is $463,216.41 as compared to last year's figure of $462,804.98. Only three of the departments submitted estimates over the figure submitted last year, and these, when summed up, amounted to much less than the reductions that were effected by the other departments.

### LONG STRONGER

BATON ROUGE, La., May 10.—(AP)—Sen. Huey P. Long got a stronger hold on Louisiana politics today with his latest "dictator" laws, enacted at a special session of the Legislature last month, becoming effective at noon.

# New Chippewa Chief

—Associated Press Photo.

**With the death of his great uncle, Chief Go-gon-gaush, George B. Selkirk (above), part-Scotch and a graduate of Haskell Institute at Lawrence, Kas., proclaimed himself chieftain over Minnesota's 11,000 Chippewa Indians. His Indian name is Little White Cloud.**

# Elect Officers For Engineer Groups

Officers for the student branches of the A.I.Ch.E. and the A.I.E.E., two organizations for engineers, were elected for the coming year at their respective meeting last Thursday night.

The new A.I.E.E. officers, selected from the junior class, are: Rupert B. Bell, president, Thomas K. Jefferies, vice-president, Willis R. Welton, secretary, Chas. H. Egeler, treasurer, and Ralph B. Bodine, Engineering Council Representative.

Officers, also juniors, for the A.I. Ch.E. are: Herbert J. Goldsworthy, Jr., president, William R. Snatr and Paul L. Daley, vice-presidents, R. Warner, secretary, William H. Thompson, treasurer, and Howard J. Jackson, Engineering Council Representative.

Reports of the year and information concerning the Engineering Open House were included in the meeting, the last to be held this year.

# Officers Ordered To Active Stations

Two special students in the University who are officers in the United States Army have been transferred to active duty stations from their work here, according to a War Department order published here yesterday.

The officers are First Lieut. Charles A. Bassett, who has been assigned to Rockwell Field, Calif., and First Lieut. Russell J. Maltz, who has been assigned to Wright Field, O.

Both of the officers had been sent here by the War Department to obtain further technical training along the field in which they had previously specialized. The University is one of several schools and colleges throughout the country which have been chosen by Army officials as an advanced training school for their officers.

# Court Docket For May Term Light

The criminal docket for the May term of the local circuit court is one of the lightest in years, Prosecutor Albert J. Rapp said yesterday in announcing that in all probability no jury cases at all will be tried.

All defendants on criminal charges with the exception of one have announced their intention of pleading guilty according to Prosecutor Rapp. Leopold Zykowski, Detroit youth who is held here on two larceny charges, has not yet made up his mind as to whether or not he will demand trial by jury, Prosecutor Rapp added.

6 Mothers To Win Free Ride Over Ann Arbor In Lottery Contest Sunday, May 12th

MOTHERS—Visit the Airport Sunday and enter your name in this contest by four o'clock. The six lucky winners will be chosen and the rides will be awarded.
